EQUIMAX®
Can be used from 2 weeks of age.

**FAECAL WORM
EGG COUNT**

EQUEST®
Do not administer to young foals less than 4 months of age

Vaccinations ○ Circle on the Calendar when your horse/pony's vaccination is due. You can also contact the clinic, give your email address and we will email you a reminder when your vaccinations are due.

*Recommend us to a friend and we'll give you both £10!**

- Annual health checks**
For just £99 + VAT
Included in this price is:
- Clinical examination
 - Examination at walk and trot
 - Blood sample or faecal worm egg count
 - Dental examination and rasp
 - Annual vaccination

Poo in the Post!
Regular worm egg counts will help you to monitor your horse/pony's worm burden. A faecal Worm Egg Count is £14.80 per horse/pony.

For batches of 5 or more the price is £12.60 per sample.

Request a kit either by phone on 01487 773333 or order on our online shop www.fellowsfarm.com obtain the sample and put the poo in the post.

- Remember**
- If the Faecal Worm Egg Count is negative DO NOT administer a wormer. Please contact us if you require further advice.
 - Poo pick your paddocks twice weekly in the summer and once weekly in winter.
 - New horses to you or the yard, we recommend treatment with Equest and stabling for 2-3 days before turn out.

*Further terms and conditions apply please visit www.fellowsfarm.com for full details.

Recommended Parasite Control & Worming Protocol

Fellowes Farm Equine Clinic Ltd
VETERINARY SURGEONS

Equimax & Eraquell Syringes are sufficient to treat a horse up to 700kg

Equimax & Eraquell Tablets are sufficient to treat a horse up to 800kg

An Equest Syringe is sufficient to treat a horse up to 600kg

New scientific research has updated our current understanding of the resistance of horse parasites to the wormers available. Our advice has therefore changed on how best to utilise the wormers that we have available.

WE ADVISE ROUTINE WORM EGG COUNTS AND TARGETED WORMING AND NOT WIDESPREAD UNNECESSARY WORMING

We recommend a 6 point plan:

1. A reduction in how often wormers are administered.
2. Faecal Worm Egg Counts (WEC) should be used four times a year in late February, early May, early August & early November to find out if worming is necessary
3. Use "Targeted Treatments" on horses that show a positive WEC.
4. If the WEC is negative DO NOT administer a wormer.
5. Collect faeces off your paddocks - twice a week in the summer and once weekly in winter.
6. If you have sheep or cows mixed grazing is a good idea.

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Winter		Spring		Summer				Autumn		Winter	
Equest (if not given in Nov-Dec)		Equimax		Eraquell (if indicated by POSITIVE WEC)		Eraquell (if indicated by POSITIVE WEC)		Equimax		Equest At Christmas	
For encysted small redworm and Bots		To treat for Tapeworm		For Large and Small Redworms, Roundworms and Pinworm		For Large and Small Redworms, Roundworms and Pinworm		To treat for Tapeworm		For encysted small redworms and Bots	
WEC		WEC		WEC		WEC		WEC		WEC	

Pregnant Mares

Equimax, Eraquell & Equest can all be used in pregnant mares and worming at time of foaling is recommended.

Foals

Equimax & Eraquell can be used from 2 weeks of age.
Equest can be used from 4 months of age.

We recommend that new horses to you or on the yard are treated with Equest and then stabled for 2-3 days before turn out.
